Access to Skelton Grange Landfill M1 Junction 45/ East Leeds Link Road

As you maybe aware Leeds City Council have nearly completed the development of the East Leeds Link Road (ELL). The completion of this road through Cross Green Industrial Estate, and the opening of Junction 45 (M1) and its links through to the M601 and is likely to improve transport routes substantially on this side of the city.

The opening of the above will coincide with the **closure of Pontefract Lane at Newsam Green to the East of our site entrance (the traffic lights by the farm)**. A Highway's restriction will be in place preventing vehicles passing through the road at this point. Please also be aware that we have been advised that the police will closely monitor this restriction.

To this end, Please be aware that access to Skelton Grange will (once open) only be possible via Junction 45 (M1), or via the ELL through Cross Green Industrial Estate.

The date has now been finalised by Leeds City Council Highways Department as **Tuesday 10 February 2009.**

If you require any further information please contact Leeds City Council Highways department on 0113 247 6162
